Pipe Clamps

At Direct Channel Support Systems, our Pipe Clamps range is engineered for strength, durability, and versatility across mechanical, electrical, and plumbing installations.

We offer a comprehensive selection of high-quality pipe clamps to suit every application – from light-duty fixings to robust support solutions for industrial-scale pipework.

Manufactured from premium materials such as BZP (Bright Zinc Plated), HDG (Hot-Dip Galvanised), and Stainless Steel, our clamps are trusted for their corrosion resistance and secure channel mounting capabilities.

Whether you're supporting copper, steel, or plastic pipework, our clamps are compatible with Unistrut-style channels and available in multiple sizes and finishes to suit standard installation requirements. With a full range of heavy-duty two-bolt clamps, rubber-lined options, split bands, and H-frame fixings, our solutions are relied upon by contractors across the UK construction and engineering industries.

Explore the pages ahead for detailed product specifications, finish options, and part numbers to support your next project with confidence.
