

## Channel Socket Range — Impact-Rated Nickel Chrome

17mm & 19mm A/F | M10 & M12 | For 41x21, 41x41 & 41x82 Channel | Impact Rated to 390Nm | British Made

Direct Channel Channel Sockets are precision, impact-rated drive sockets made to tighten and release channel nuts and bolts inside strut channel quickly — without the socket jamming in the channel when the fixing is pulled up tight. Each socket is nickel chrome plated and takes a standard 1/2" square-drive ratchet or impact driver.

The range covers 17mm A/F (M10) and 19mm A/F (M12) fixings across 41x21mm, 41x41mm and 41x82mm channel, including extended-reach (E) sockets for deeper and back-to-back sections. Manufactured in Sheffield, England and independently tested to destruction at 390Nm. Sold individually.
